

February 2006 Status Report

February seemed like a very short month for the BCeSIS iGroup. It was busy a month with training for the second wave of schools, and the immanent transition to production for a couple of schools

The major activity for the iGroup this month focused around the first training session for the second wave of schools. This training was a large success with fifteen schools being trained and starting the process towards implementing BCeSIS. Once again Deb did a superb job teaching these schools. The iGroup would like to thank Credo Christian High School for the use of their computer lab to accommodate training.

Finally, continue to check the website (www.bcesisigroup.ca) for regular updates and announcements, and feel free to email me (andrewsmit@bcesisigroup.ca) if you have any concerns or questions.

Thank-you

Andrew Smit
BCeSIS iGroup Project Manager.
