Maximum distinct user logon sessions in a day	9,457
Total distinct user logons for the week	26,458
Maximum number of reports run in a day.....	24,826
Maximum concurrent users in a day	3,685

Operations

Tim Reilly

SD Test was refreshed on the weekend (July 3,4) and is current with Production as of Friday, July 2nd.

Reminder: BCeSIS (all environments) will be unavailable on July 10 and 11 as we perform system maintenance.

On July 12th we will implement some changes which will cause multiple Java warnings for anyone with multiple versions of the JRE. Please review the document on the ISW for recommendations on what to do. The document can be found at:

*ISW Home > Technical Resource Centre > JAVA Runtime Environment > **Digital Security Certificates Recommendations***

Application Management

Dorothy Ward

With regard to the multiple JRE, we are activating the **Delete Inactive Student** functionality on July 12th. Further to the Operations update, once this is implemented there is the possibility you will see the multiple JRE messages.

The **Service Desk is now on summer hours**, 8:00 am to 4:00 pm. Please be aware that any HEAT tickets submitted or calls made after 4pm will be answered the following business day. We will be back to regular hours on September 7, 2010

Recently reported to aal:

Nothing this week.

Training and Support

Daniel Bond

Follow up: As reported in last week's minutes, we identified that there must be a teacher assigned to each course section in order for students to be counted by the BC Enrolment report. To find out if a teacher is assigned to a section of a course, the **Courses Without Teachers/Rooms** report will identify which sections of courses do not have teachers assigned. This can be run in next year.

Reminder: The new **Learning Event Schedule** is posted on the ISW, please have a look. If you register for any learning events now, you can generate a list of your sessions later as a reminder of what you signed up for.

Governance

Andrew Macauley

The last SMC Executive meeting was held last Tuesday. The group discussed some planning processes for the summer, and will be bringing back some project proposals in September for new services being considered. The next meeting will be August 31st via conference call, and the next full SMC meeting in October. From a governance point of view, things will be very quiet over the summer.

SEWG

Victoria Williams

The SEWG is working through the operational enhancements for next year. Change requests may still be submitted and will be recorded, but will not be reviewed until the fall.
