Total distinct user logons for the week .....	9,650
Maximum number of reports run in a day.....	10,593
Maximum concurrent users in a day .....	1,356

### Operations

*Tim Reilly*

**Infrastructure changes** were successfully completed on the weekend. The next set of changes will be made in the Training environments on July 24/25. There is maintenance scheduled for Production in early August, following YET.

### Application Management

*Dorothy Ward*

**StrongStart Attendance** data was successfully extracted and uploaded to the Ministry yesterday.

**aal's SLA definitions** have been posted on the ISW under:  
*Learning Resource Centre > Training and Support > aal Guides and SLA definitions*

The **Delete Inactive Students** function will be implemented on Wednesday, July 14<sup>th</sup>.

### Training and Support

*Chris Wilson*

There are two additional courses that need to be excluded from the **Class Size Verification report**: DPA and Grad Transitions. We are updating the Class Size At-a-Glance Guide to reflect this and will post the updated version shortly.

Otherwise, we are busy still with YET support and have begun preparations for our Back to School series of learning events; reminder to check the LE Schedule on the ISW for events from August – December that have already been posted and are open for registration. Additional events will be posted as they are confirmed.

### Governance

*Andrew Macauley*

There is nothing specific to report now that summer has begun. The next meeting of the SMC won't be until October.

## Other Agenda Items and Discussions

### Summer School

There was a discussion about the 1701 process for Summer Schools and where to find the information required to complete this successfully. Please refer to the processes defined under the **ISW > District Collaboration Centre > Information Updates > Summer School**.

### SADE

There was a question on the call about the loss of leading zeros in school codes and STDP records when the SADE csv file is opened in Excel. This can be prevented by following the instructions exactly that are outlined in “Appendix B: working with the .csv file”, on page 19 of the **SADE reference guide** on the ISW.
